Notes, abbreviations and sources

Notes Global and Regional data give only a gross indication of the global and regional leprosy trends. The countries reporting to WHO are different from one year to another. This makes comparisons imprecise.

* Available data show an imprecision for South -East Asia and India for the year 1991
Numbers should be higher for South-east Asia
South -East Asia data not reliable also for 1992 and 1995

** Available data show an imprecision for Americas and Brazil for the years 1991, 1997 and 2001
Numbers should be higher for Americas

*** The 1985-1993 series of global data refers to 32 selected countries only.

Abbreviations:

na Data not available
NCD New case detection
WER Weekly epidemiological record
